Artesia Pianos

We would like to express our appreciation and congratulate you for purchasing this Artesia Deluxe Digital Upright Piano. This piano has been designed to, with proper care, provide you with years of musical enjoyment.

Artesia's advanced state of the art electronics are combined with an elegant cabinet that adds beauty and sophistication to any home environment.

This piano is a feature packed entertainment center that's fun for the whole family – It's more than just a piano!

Listed below are just a few of the features that your new piano is equipped with:

- Artesia's acclaimed stereo imaging
- 137 Instrument Voices Including a Stereo Grand Piano

٠

- Acoustic instrument voices offering unmatched realism
- Digital effects to further enhance the instrument voices
- 100 Rhythm and Accompaniment Styles with variations of those styles
- Elegant Hand Rubbed Lacquer Cabinet Fits
 Any Sized Room
- Fatar, Italian Made Hammer Action Keyboard. Used by major Artist the World Over
- Authentic Acoustic Piano Touch and Feel Teacher Recommended!
- Sustain, Soft and Sostenuto pedals
- Built-in Track Recorder to Record and Playback your Performance You Can Record Practice Sessions

- Built-In Music Teacher with optional Screen Grading and 55 built in play-along songs
- USB Jump Drive to Play Prerecorded Music – Play Hundreds of Music Files Jazz, Pop, Classical, Rock, Country & More!
- Interface to Your Computer with On-Board MIDI and USB ports
- Never Needs Tuning
- Headphones to Practice in Private
- Metronome feature with variable tempo to facilitate practice
- Included Bluetooth BT-1 Wireless Receiver
- Reverb and Chorus Effects
- Pan, Transpose and Octave
- Classical Half Sustain
- Programmable Auto Power Off
- MIDI compatible duet feature for student and teacher play

You will find even more features and functions listed within this owners manual. In order to fully appreciate all the impressive features of this digital piano, please take a few minutes to read the following pages of instruction. General precautions, the function of each control button, and warranty information will be covered. Please save this manual for future reference.

WARRANTY INFORMATION

prepaid.

WARRANTY This product, except the exterior cosmetic parts, is warranted to the original purchaser to be free from defects in material and workmanship under normal use as follows: 1. For a period of one year from the date of purchase, Virgin Musical Instrument Company will pay the labor charges to repair the defective product. After this one year period, you must pay all labor charges. 2. In addition, Virgin Musical Instrument Company will supply, at no charge, new or rebuilt replacements for defective parts for a period of one year from the date of purchase. In the event repairs are needed, the original purchaser should contact Virgin Musical Instrument Company, the parent company of Artesia Pianos, at 888-998-9848. Virgin Musical Instrument Company will then repair the product or return it to the VMI distribution center for repairs. Upon completion of the repair, the unit will be returned to the music store, freight This warranty will not apply to this product if it has been misused, abused,

or altered. Without limiting the foregoing, bending, dropping of unit, or visible cracks and/or scratches are presumed to be defects resulting from misuse or abuse.

This warranty is void if the product has been opened.

Neither this warranty nor any other warranty expressed or implied, including implied warranties of merchantable, shall extend beyond the warranty period.

No responsibility is assumed for any incidental or consequential damages.

Outside the US contact the original retailer where the product was purchased for additional warranty details.

IMPORTANT SAFETY INSTRUCTIONS

INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS

AVIS : RISQUE DE CHOC ELECTRIQUE - NE PAS OUVRIR.

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK).

The lighting flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons

Read all the instructions before using the product.

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade the third prongs are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

SAVE THESE INSTRUCTIONS

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product

e care not to allow fingers to be trapped.

bly of the product is prohibited.

carried out. nove the power cord plug from the AC outlet.

	10)	Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
	11)	Only use attachments/accessories specified by the manufacturer.
in	12)	Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
`	13)	Unplug this apparatus during lightning storms or when unused for long periods of time.
5	14)	Refer all servicing to qualified service personnel. Servicing is required when the
b		apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects
or		have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
ΔT		

WARNING - When using electric products, basic precautions should always be followed, including the following.

TROUBLESHOOTING

General Precautions

When the instrument is turned on or off, a popping sound is heard.	This is normal and indicates that the instrument is receiving electrical power.
When using a mobile phone, noise is produced	Using a mobile phone is close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or use it further away from the instrument.
Not all of the voices seem to sound, or the sound seems to cut off.	The instrument is polyphonic up to a maximum of 32 notes, including the layer voice, split voice, auto accompaniment and metronome. Notes exceeding this limit will not sound.
The auto accompaniment does not sound properly.	Make sure that the accompaniment volume is set to a appropriate level. Check that the split point is set to an appropriate key for the chords you are playing. Make sure that the CHORD button for is engaged.
No sound is produced by the keyboard, but the lights and screen work.	Check the master volume control. Check that nothing is plugged into the headphone socket or that LOCAL has been turned off in the Function menu.
The sound of the voice changes from note to note.	This is normal. The digital toe generation uses multiple recordings, samples, of an instrument across the range of the keyboard. The actual sound of the voice may be slightly different from note to note.
The volume is too soft. The sound quality is poor. The rhythm stops unexpectedly or will not play The recorded data of the song does not play correctly. The LCD display suddenly goes dark and all panel settings are reset.	An incorrect AC adapter which is not rated sufficiently can cause malfunction or damage. If you have lost or damaged your AC adapter, please contact your nearest dealer for the correct replacement adapter.
To completely restore all setting as set by the factory.	Perform a factory reset from the Function menu, all of the user settings will be erased and the default factory settings will be applied to the instrument.
Power suddenly and unexpectedly turns off after a period of inactivity.	This is normal outcome of the Auto Power Off feature. You can disable the Auto Power Off, in the Function menu.
The sustain pedal seems to produce the opposite effect, so that pressing the pedal deactivates the sustain and releasing the pedal triggers the sustain.	The polarity of the switch needs to be changed. Make sure the jack plug for the pedal is connected correctly and do not press the pedal while turning the piano on.

INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRIC SHOCK OR INJURY:

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated or "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operation and maintenance or servicing instructions.

1. CAUTION: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

2. Note: This equipment has been tested and found to comply with the limit for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a noncommercial environment. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

TAKING CARE OF YOUR DIGITAL PIANO

This digital piano will supply you with years of musical enjoyment if you follow the simple rules listed below.

SERVICE AND MODIFICATION

Do not attempt to open the piano or make any change in the circuits or parts of the unit. This product should be serviced by qualified service personnel when;

- The power supply cord or the plug has been damaged,
- Liquid has been spattered into the unit or it has been exposed to rain,
- The instrument does not appear to operate normally or exhibits a marked change in performance or
- The instrument has been dropped or the cabinet has been damaged.

HANDLING AND TRANSPORT

- Never apply excessive force to the controls, connectors or other parts of the instrument.
- Always unplug cables by gripping the plug firmly, not by pulling on the cable.
- Disconnect all cables before moving the instrument.
- Physical shocks caused by dropping, bumping, or placing heavy objects on the instrument can result in scratches and/or more serious damage.
- Avoid placing vinyl objects on top of the instrument, vinyl can stick to and discolor the surface.

CLEANING

- Clean the cabinet and panel with a soft, nonabrasive, dry cloth. A wax based polish may be used on the cabinet. Do not use paint thinner or chemical based polishes.
- To maintain the luster of the keys and buttons wipe with a clean, slightly damp cloth, and then polish with a soft dry cloth.

□Please note, for voices from 001 - 128 in the table, the "No." is the displayed voice number. The MIDI program number for any voice listed is one less than the display number. For example voice 001 Acoustic Grand Piano Midi program number is 000, voice 002 Bright Acoustic Biano MIDI program number is 001, and so forth

voice 002 Bright Acoustic Piano MIDI program number is 001, and so forth.

8

59

LOCATION

Do not expose the instrument to the following conditions to avoid deformation, discoloration, or more serious damage:

- Direct sunlight (near a window)
- High temperatures (near a heat source, outside, or near a window)
- Excessive humidity
- Excessive dust
- Strong vibration
- Leave enough space around the piano for it to be properly ventilated.
- This instrument contains digital circuitry and may cause interference if placed too close to radio or television receivers. If interference occurs, move the instrument further away from the affected equipment.

POWER

- Turn the power switch off when the instrument is not in use.
- To avoid damage, turn the power switches of all related devices off prior to connection or disconnection of MIDI cables.
- Turn the power off if the main cable is damaged or the instrument is spattered with liquid.
- Do not switch the unit on and off in quick succession, this places an undue load on the electronic components.
- Unplug the AC power cord during an electrical storm.
- Avoid plugging the AC power cord into the same outlet as appliances with high power consumption, such as electric heaters or refrigerators.
- Carefully check the amplifier volume control before starting to play. Excessive volume can cause permanent hearing loss.

PANEL CONTROLS

The elegant control panel is divided into several distinct sections. The following is a brief description of all the features located on the control panel.

1 STANDBY: /ON The power switch is located to the left of the keys. Press the button to turn the power on and off. The LCD screen, and the indicator lights for the start up settings, will light up when the power is turned on.

This piano is equipped with an automatic power off feature, the piano will shut off automatically after a set time of inactivity. The default time setting is 30 minutes, the Auto Power Off Time can be changed in the Function menu.

Please see the Function section of this manual for more information.

JPlease note, when you turn the power off, do not turn it back on immediately. Wait at least five seconds to turn the power back on so that the electronic circuits can properly reset.

2 MASTER VOLUME: Use this button to adjust the overall master volume of the keyboard to your desired level. Turn to the right to increase the volume and turn to the left to decrease the volume.

JPlease note, at higher volumes there may be audio "clipping" or distortion depending on the frequencies being played. Please reduce the volume if this occurs.

Please also note, the keyboard and accompaniment volumes can adjusted independently from each other and the master volume by using the KBD.VOL and ACC.VOL buttons with the DATA WHEEL.

- **3 BASS LEVEL:** With the bass tone knob you can adjust the sound of your piano to the room or according to your preferences. As a starting point, set both controls to their neutral 12 o'clock position. If you want more bass sound turn the bass control to the right and if you want less bass sound turn it to the left.
- **4 TREBLE LEVEL:** With the treble tone knob you can adjust the sound of your piano to the room or to your taste. As a starting point, set both controls to their neutral 12 o'clock position. If you prefer a brighter sound turn the treble control to the right, if you prefer a more "rounded" tone turn the treble control to the left.

MIDI CHANNELS

The MIDI system in this unit has 16 channels numbered from 1-16. Each of the channels is responsible for a voice. When the instrument receives from an external device, the active channel is determined by the control message. The transmission channels on this keyboard are fixed as follows:

- Channel 1: Master voice
- Channel 2: Laver voice ٠
- Split voice Channel 3: •
- Channel 4: Bass in manual bass chord mode •
- Channel 7: Chord in manual bass chord mode
- Channel 10: Percussion sound •
- Please see the MIDI Implementation Chart for more details

- 5 QUICK SELECT STYLE BUTTONS: There are four Rhythm Styles that can be selected quickly rhythm name and its number will be shown on the display. display. There is a complete list of all 100 styles in the back of the manual.
- 6 ACC. VOL: Press the ACC.VOL button and use the DATA WHEEL or the +/YES or -/NO buttons to voice will not be affected.
- **7 KBD. VOL:** Press the KBD.VOL button and use the DATA WHEEL or the +/YES or –/NO buttons accompaniment will not be affected. To adjust the volume of the layer voice press the LAYER button and while the indicator is to adjust the volume of the keyboard instrument layer voice only. To adjust the volume of the split voice press the SPLIT button and while the indicator is to adjust the volume of the keyboard instrument split voice only.
- 8 CHORD/O.T.S.: Each of the 100 rhythm styles has a fully orchestrated auto accompaniment auto accompaniment finger mode with the FUNCTION button. Please see the Auto Accompaniment section of this manual for more information.

Press and hold the CHORD/ O.T.S. button to toggle the O.T.S., or one touch setting, on and off. This convenient feature automatically selects the most suitable voice and various panel settings for the rhythm style, and it's corresponding auto accompaniment.

9 SYNCHRO: Synchronized Start sets the auto accompaniment into standby mode. The rhythm style will start as soon as you play on the left hand side of the keyboard. With auto accompaniment engaged the rhythm style will start as soon as you play on the left hand side of the keyboard and the auto accompaniment will start with the first recognized chord played, depending on which fingering mode is selected. Pressing the SYNC START button again will stop the auto accompaniment and put the keyboard back on standby mode.

57

by pressing one of the four quick select rhythm style buttons. The rhythm style name is printed above the style select button. Press a button to select the style of your choice. The selected

This piano offers 100 rhythm styles and a variation of each style pattern to choose from. Press any style select button to engage the style select menu and use the +/YES and the -/NO buttons or the DATA WHEEL to select a style. The style name and its number will be shown on the

10 INTRO/ENDING: Each of the 100 rhythm styles can be started or finished with a detailed introduction and/or ending pattern.

When INTRO/ENDING is engaged, an introduction of rhythm pattern will sound followed by the main pattern. When a rhythm or accompaniment pattern is already playing, the accompaniment will be professionally completed with an ending pattern from the next measure by pressing the INTRO/ENDING button.

- **11 START/STOP:** The START/STOP button immediately starts or stops the selected rhythm style. The auto accompaniment will start with the first recognized chord played depending on the fingering mode selected.
- **12 FILL IN 1:** The fill-in feature provides the accompaniment with a short rhythm pattern of one or two measures for each style.

Press the FILL IN button at any time while the accompaniment is playing to add a fill. If you hold down the FILL IN button, the fill pattern will repeat until the button is released, and then the main pattern will resume from the beginning of the next measure. The FILL buttons can also be used to start a rhythm style.

13 FILL IN 2 VARIATION: The 100 rhythm styles and their corresponding auto accompaniments all include a variation of that style and accompaniment that can be heard simply by engaging the FILL IN 2 VARIATION button. Press the FILL IN 2 VARIATION button and the fill variation will play followed by the variation of the selected rhythm style. The FILL buttons can also be used to start a rhythm style.

Press the FILL IN 1 button again to disengage the variation and return to the main pattern after the fill.

MIDI

MIDI stands for Musical Instrument Digital Interface. This is a worldwide standard communication interface that enables electronic musical instruments and computers of all brands to communicate with each other so that data can pass between them. This exchange of information makes it possible to create a system of MIDI instruments and devices that offers far greater versatility and control than is available with isolated instruments. Whether you interface with computers, sequencers, expanders or other keyboards, your musical horizons will be greatly enhanced.

If you are an advanced MIDI user, this section will help you to access the MIDI controller capabilities of the piano. If you already know that you need this specialized functionality, then this section is for you. However, this information is not necessary in order to enjoy playing the piano.

MIDI CONNECTION

The MIDI terminal is located on the left side of the piano, under the key-bed. For more information regarding transmitted MIDI data please see the MIDI implementation chart at the back of this manual. The MIDI Local, USB MIDI In and the MIDI Out are turned adjusted using the Function menu. Please see the Function section of this manual for more information.

MIDI OUT

This terminal transmits data from this instrument to other MIDI devices. The transmitted data includes the note and touch velocity produced while playing on the keyboard, as well as voice changes, wheel operation, and recorded playback for the melody tracks. Demo songs and auto accompaniment are not transmitted.

LOCAL ON/OFF

This function allows you to turn on or off the speaker system of the piano, local is the MIDI Channel message that sets whether your keyboard is going to trigger its internal sounds (Local ON) or not (Local OFF). Normally, playing on the keyboard generates sound while it sends MIDI messages via the MIDI connector or USB. This mode is called Local On. You can mute the piano sounds while still sending out the MIDI messages. This mode is called Local Off. Turning the Local On/Off function to off, will disconnect the keyboard from the internal sound engine of the piano. This means you can use the piano as a MIDI controller to control other MIDI devices or virtual instrument software running on your computer without playing the internal sounds of the piano. You may also find other occasions such as when you are using MIDI sequencing software on your computer, where it is useful to turn the Local Off. Local On/Off is found in the Function menu. Please see the Function section of this manual for more information.

56

11

BLUETOOTH

"Please note, Bluetooth devices should be placed near and in direct view of the Bluetooth receiver when initially set up. The distance and strength of the signal will depend on environmental conditions. Please make sure the volume of the piano and the Bluetooth device is turned up.

If you are unable to connect to your Bluetooth device, please make sure that any other previously connected device has been disconnected.

If you are still unable to connect, please turn the Bluetooth function on your device off, and then back on to attempt to connect.

To change Bluetooth devices during normal operation disconnect the first Bluetooth and then reconnect to the new device following the above instructions.

JPlease also note, due to differences in Bluetooth technology, some Bluetooth enabled devices may be incompatible, function improperly, or may not support all features when used with the wireless receiver.

TROUBLESHOOTING

Please make sure the volume of the piano and the Bluetooth device is turned up.

If you are unable to connect to your Bluetooth device, please make sure that any other previously connected device has been disconnected

If you are still unable to connect, please turn the Bluetooth function on your device off, and then back on to attempt to connect. To change Bluetooth devices during normal operation disconnect the first Bluetooth and reconnect to the new device following the above instructions.

Grand Piano Tem: 120 Vol: 127

- **18LAYER:** Pressing the LAYER button will put the keyboard in the layer, or dual, mode. Layer refers to an additional voice that is tone mixed with the main selected keyboard voice. The assigned layer voice will be heard with the original voice when the keys are played. Please see the Keyboard Voices section of this manual for more information.
- **19 TOUCH:** The touch function provides three types of keyboard sensitivity to match different playing styles. The TOUCH button engages the touch response. Use the +/YES or -/NO buttons to change the touch response within three seconds after the TOUCH button has been engaged... press the TOUCH button again to turn the Touch feature off, the fixed response. Please see the Keyboard Voices section of this manual for more information.
- 20 SPLIT (LOWER): With the split feature engaged the keyboard operates in the split, or lower mode. In the split mode the keyboard is divided into two sections. In the right hand section the main or layered voice will sound, and in the left hand section a different voice can be assigned to sound when the keys are played.

Please see the Keyboard Voices section for more information.

21 DUET: With the duet feature engaged the keyboard is divided into two sections, left A1-C3 and right C#3-C7 that have the exact same notes. The two sections will share the same voice and volume. This is a great feature for teaching or when two people want the play the piano simultaneously.

Please see the Keyboard Voices section for more information. JPlease note, engaging the DUET feature will disable the Laver, the Split and the Auto Accompaniment modes.

- 22 FUNCTION: The FUNCTION button is used to access the function menu. The function menu can be used to adjust or change the values of a number of settings. Please see the Function section of this manual for more information.
- 23 +/YES or -/NO: Use the +/YES or -/NO buttons to access different options of selected features and functions.
- **24 ENTER:** Use the ENTER button to confirm a selection of a feature button and to confirm selections within the function menu.

BLUETOOTH

BT-1 ARTESIA BLUETOOTH CONNECTION

Artesia adds Bluetooth to your digital piano! Plug this tiny unit into the allotted slot on the connector panel and stream high-quality audio from Bluetooth devices like your smartphone, tablet or computer. Now you will be able to listen to music files and music apps from your Bluetooth-enabled devices on your piano. This receiver is compatible with most A2DP stereo Bluetooth-enabled devices.

SPECIFICATIONS Compliant with Bluetooth 2.1+EDR specs 4dBm output max power Operates in 2.402-2.480 GHz ISM band 80dBm receiver sensitivity

The included Artesia BT-1 Bluetooth receiver turns your piano into a home entertainment center for the entire family and allows you to play along with your favorite hits.

BLUETOOTH CONNECTION

1 Make sure that the piano is powered off, if not please press the POWER button to do so. Insert the Bluetooth receiver into the Bluetooth slot located on the connector panel on the left side of the piano underneath the key-bed.

2 Press the POWER button to turn the piano on. The blue indicator light on the Bluetooth receiver will flash.

3 Press the FUNCTION button and use the +/YES, –/NO buttons or the DATA WHEEL to select The Bluetooth Menu.

4 From the sub-menu, turn the Bluetooth feature on by pressing the +/YES button and then the ENTER button. The blue indicator will begin to flash quickly, it will continue to flash, once every .7 second, while connecting to another Bluetooth device.

5 You will find the Artesia BT-1 as an option on your Bluetooth device's settings, select the BT-1 from your device to connect. When the BT-1 receiver has successfully connected the blue indicator light on the receiver will remain on.

Use your Bluetooth device to access the information that you want to hear through the piano. The keyboard is available for playing while the recording is playing back. Play along with your favorite band!

6 Use the Function Bluetooth menu again to turn Bluetooth off.

13

001 : GRAND PIANO Off: Bluetooth

USB

USB is a digital audio interface. The USB feature allows you to record your songs or registrations on a USB drive, or to listen to any MIDI files prerecorded onto a USB.

INSERT THE USB

Insert the USB flash drive in the USB TO DEVICE slot with the top (fat) side up and leading into the slot. Gently push the USB drive into the slot, it will be a snug fit and the protruding end will be angled slightly upwards. Do not force the USB drive.

REMOVE THE USB

To remove the USB flash drive grasp the protruding end and pull straight out at following it's upward angle until it slides out from the slot, again it is a snug fit, do not force.

Do not remove the USB flash drive or turn off the power when the USB TO DEVICE is engaged to avoid memory loss or damage to the USB flash drive or the USB TO DEVICE reader.

PLAY

To play the prerecorded SMF (Standard MIDI File) format songs that are on the USB flash drive. 1 Insert the USB flash drive into USB TO DEVICE slot. The blue indicator light on the MEMORY button will be lit and the screen will show the first song available for playback.

2 Use the +/YES, -/NO buttons or the DATA WHEEL to select a song.

3 Press the PLAY/STOP button, the blue indicator will flash and the music sequencer will

automatically load the first MIDI File Song that is on the USB and it will begin to play. The music sequencer will continue to load and play all songs in sequence.

The keyboard is available for playing while the recording is playing back. If the metronome is engaged it will tick to the tempo of the recording. You can adjust the tempo by using the TAP/TEMPO button and the DATA WHEEL.

4 Press the PLAY/STOP button at any time to stop the play or to select another song.

5 Press the MEMORY button to disengage the USB drive, press the MEMORY button again to return.

JPlease note, the USB Play Mode, USB Play Speed, USB Play Volume and USB Mute Track can all be manipulated from the Function menu.

Please see the Function section of this manual for more information.

Please see the Record section of this manual for information regarding recording to USB.

CONNECTOR PANEL

This connector panel, is located on the bottom left of the piano, under the key bed. It allows you to connect external audio equipment, a computer, MIDI equipment or headphones.

1 HEADPHONES 1 & 2: You can play in total silence, without disturbing others in the room, by plugging a set of headphones into one of the appropriate sockets. When headphones are plugged into either of these jacks the internal speaker system is turned off. Two sets of headphones may be used simultaneously.

JPlease note, using headphones at high volume levels may cause permanent hearing damage.

- 2 MIDI OUT: This piano contains a MIDI output port that transmits MIDI data to another MIDI device allowing communication with other products equipped with MIDI interfaces. Connect the piano's MIDI Out to another device's MIDI In to transmit MIDI data to that device. Please see the MIDI section of this manual for further details.
- 3 USB TO HOST: USB is a digital audio interface. The USB connector allows you to connect the piano directly to your computer's USB port by USB cable. This allows you transfer MIDI information over USB to a computer. This piano is USB Class Compliant, therefore there is no need to install a driver. Just plug it in and the OS will do the rest. The piano will work with all standard MIDI based computer software.

"Please note, for recording and listening to MIDI files use the USB TO DEVICE dock located on the right side of the control panel.

JPlease also note, do not turn on the piano with the USB cable connected to the computer to avoid having to restart your computer. It can be connected without driver installation under the Windows XP, Windows 7 and MAC OSX environment. The piano will be recognized as USB audio device to receive and transmit MIDI messages.

- 4 BLUETOOTH: Plug the tiny Bluetooth receiver unit into the allotted slot on the connector panel to stream audio from any Bluetooth device. Turn the Bluetooth capability on and off in the Function menu. Please see the Bluetooth section of this manual for more information.
- **5 AUX IN:** These stereo RCA audio input jacks will amplify the supplied signal through the internal sound delivery system. They can be used to hook up items such as CD players, MP3 player or Cassette player. The audio output from the other sound system can be mixed with the sound of the piano, this function is convenient for playing along to a favorite song.
- 6 LINE OUT: These stereo RCA line audio output jacks supplies the piano's output signal to external amplification, such as home stereo, PA system or keyboard amplifier or to send to a mixing console or tape recorder. The piano's internal sound system will remain on unless headphones are plugged into either headphone iack.
- 7 **INPUT LEVEL:** Use this control knob adjusts the Aux In signal level for the piano. Turn the knob clockwise to increase the level and counterclockwise to decrease the level.

PLAY ALONG SONGS PRACTICING THE RIGHT HAND MELODY OF THE SONG

- indicators will be off.
- appear on the display.
- **3** Press the SONG RIGHT button. The indicator will turn on.
- play, and you can play the right hand melody notes.

JPlease note, if you want to play slower or faster than the preset tempo, use the TAP/TEMPO button and the DATA WHEEL, to change the tempo value range from 40 to 240 bpm (beats per minute). To recall the default tempo for the selected song press the PLAY/STOP button twice to stop and restart and the song will be reset.

5 The song will stop automatically when it is finished, or you can press the PLAY/STOP button at any time to return to Play Along Song standby. If the Song Grading feature is turned on, you will have a percentage grade displayed in the LCD screen when the song is finished, if you stop the song early there will be no grade. Song Grading can be turned on and off in the function menu. You need to exit the Play Along Song music teacher mode to access the Function menu.

6 Press the PLAY/STOP button to try again, or next try the Left Hand, or press the SONG LEFT and the SONG RIGHT buttons simultaneously to exit the play along song mode, the PLAY/STOP indicator will go out, then press both track buttons, one at a time, so the indicator lights turn off.

50

PLAY ALONG SONGS

There are 55 songs, of varying difficulty, built into the piano for you to practice and learn how to play. These songs have separate left hand or accompaniment, and right hand or melody, parts that can be turned on and off independently, so you can learn right, left and both hand portions as you progress in skill.

SELECT AND LISTEN TO A SONG

1 Press the TRACK 1/SONG LEFT and the TRACK 2/SONG RIGHT buttons simultaneously, the PLAY/ STOP indicator will flash blue and the first play along song will appear on the display. Both SONG LEFT and SONG RIGHT indicators will be off.

2 You can use the +/YES, -/NO buttons or the DATA WHEEL to select a song. The song number and title will appear on the display.

3 Press the PLAY/STOP button to listen to both hand portions of the selected song. The song will start after a four beat count in.

> 001 : GRAND PIANO ****001:SONG****

4 The song will stop automatically when it is finished, or press the PLAY/STOP button at any time to stop the playback. The Play Along Song feature will return to standby for you to listen again choose another song or try the Play Along Song Left Hand, Right Hand or Both Hands.

5 Press the SONG LEFT and the SONG RIGHT buttons simultaneously to exit the play along song mode, the PLAY/STOP indicator will go out, then press both track buttons, one at a time, so the indicator lights turn off.

Please note, indiscriminate pressing of the RECORD SELECTION and the SONG/TRACK buttons can overload the piano and cause the circuits to jam. In the event of that occurrence you may need to turn the piano off to reset the circuits.

PEDALS

This piano is complete with three function pedals.

- **1 SOFT PEDAL:** When the left soft pedal is engaged the piano volume is reduced and the timbre slightly altered on the notes that are played.
- 2 SOSTENUTO PEDAL: When the center pedal is engaged, the keys that are pressed are not affected.
- 3 SUSTAIN PEDAL: Like the damper pedal on an acoustic piano the the right sustain, or damper, pedal will sustain the sound of the piano voice after releasing the piano keys while engaged. The length of sustain time is determined by the amount of pressure used to depress the pedal. This piano also has a Half Sustain feature that can be turned on and off in the Function menu.
 - Please see the Function section of this manual for more information.

18

49

and already sounding will continue to sustain and the notes will decay gradually after they are released. Keys that are played after the pedal has been pressed

DEMO

This piano has ten different demonstration, or demo, songs that are designed to showcase the different sampled voices that are available.

PLAY DEMO SONGS

1 Press the DEMO button, the indicator light will turn on and the first demo song will play. The demo song and number will appear on the display and will change as the subsequent songs play. This piano has ten demo songs that will all play in sequence.

2 Press the DEMO button again to stop the demonstration.

CHOOSE A DEMO SONG

1 Press the DEMO button.

2 Use the +/YES or the -/NO buttons to change songs while the demo is playing, or use the DATA WHEEL to quickly scroll through the song options.

After the song is finished the rest of the demo songs will play in sequence from that point.

3 Press the DEMO button again to stop the demonstration.

PLAY ALONG SONGS DEMO

There are 55 songs for the Play Along Song music teacher feature that can also be played back for demonstration.

1 Press the LEFT and RIGHT SONG buttons simultaneously to enter the music teacher feature. The PLAY/STOP and DEMO button indicator lights will flash and the display will show the first play along sona.

2 Use the +/YES or the –/NO buttons or the DATA WHEEL to change songs (before or while the demo is playing).

3 Press the DEMO button to start the song.

4 Press the DEMO button again to stop the demonstration, and press the LEFT and RIGHT SONG buttons simultaneously again to exit the play along song music teacher mode.

Please see the Play Along Song section of the manual for more information.

RECORD **USB** RECORDING

4 To record a new track on the selected song, press and hold the RECORD button and then press the TRACK button (not the TRACK1/SONG LEFT or TRACK2/SONG RIGHT buttons) at the same time new track will be created. Any previously recorded track will play and the new track will be layered onto the recording.

To record a new song number press the RECORD button, a new song will be created. The indicator on the RECORD button will flash and the metronome will sound if engaged. Recording will begin after a four beat count in.

5 When you finish your recording press the RECORD button again to stop recording.

PLAYBACK

1 Press the PLAY/STOP button to hear the recorded track(s) shown on the display. The PLAY/STOP button's indicator will blink during the playback. You can change the tempo of the playback by pressing the TAP/TEMPO button and using the DATA WHEEL, however this will not change the recorded tempo. The keyboard is available for playing while the recording is playing back. If the metronome is engaged it will tick to the tempo of the recording. JPlease note, the USB Play Mode, USB Play Speed, USB Play Volume and USB Mute Track can all be manipulated from the Function menu.

Please see the Function section of this manual for more information.

4 Press the PLAY/STOP button again to stop the playback. Playback will stop automatically when the recording reaches its end.

DELETING TRACKS

 Use the DATA WHEEL to select the song and track you wish to delete so that it is showing on the LCD screen. Press and hold the RECORD button and the MEMORY button at the same time. The LCD screen will display a confirmation screen asking if you wish to delete your track. Press +/YES button to confirm, the track will be deleted.

RECORD

USB RECORDING

1 Before recording prepare the piano by setting the voice, style, volume, tempo, reverb level and other parameters as desired.

JPlease note, these settings can be stored into a registration memory for easy recall, please see the Registration Memory section for more information.

2 If desired, press the METRONOME button to enable the metronome as a reference. The metronome will sound to the tempo and beat assigned, if you wish to adjust the tempo, do so by using the TAP/ TEMPO button, and if you want to adjust the beat do so in the Function menu before recording as they cannot be changed during recording. The metronome tick will not be recorded.

If you have already recorded one track, the second track's tempo and beat pattern will follow the setting of the first recorded track.

3 Insert the USB disk into the USB TO DEVICE terminal, after a moment the blue MEMORY button indicator will light up signaling that the USB is engaged. If the MEMORY button indicator is not lit, please press the MEMORY button to engage the USB thumb drive.

The display screen will show that the disk has been inserted and then display the first song available on the disk in the format of (File # : SONG #- Track#). Use the DATA WHEEL to cycle through the available songs.

KEYBOARD VOICES

This piano offers 137 GM (General MIDI) authentic acoustic instrument voices offering unmatched realism with digital effects to further enhance the sound. Please see the complete list of all 137 voices in the Voice List at the back of this manual. JPlease note, the keyboard and accompaniment volumes can adjusted independently from each other and the master volume by using the KBD.VOL and/or ACC.VOL buttons with the DATA WHEEL.

VOICE SELECT

QUICK SELECT VOICE BUTTONS

There are eight voices that can be selected quickly by pressing one of the voice select buttons: Grand Piano, Electric Piano, Vibraphone, Acoustic Bass, Harpsichord, Rock Organ, String Ensemble and a User defined option. These voices are assigned to Instrument line A. The voice name in line A is printed above the voice select button.

1 If needed press the A/B button to select voice line A. The indicator will be *unlit* when line A is selected.

2 Press the voice select button that corresponds to the desired voice. The voice name and its number will show on the display and the newly selected voice is available for playing.

SELECTING ONE OF THE 137 VOICES

1 The buttons in the VOICE SELECTION group are dual function buttons. The Voice buttons are assigned to the top line A. Make sure that the indicator light on the A/B button is not lit, press the A/B button if necessary.

Press a Voice button to engage the voice selection mode, the indicator will turn on, and the screen will show the currently selected main voice.

2 Use the DATA WHEEL and/or the +/YES, -/NO buttons to scroll through the voices. The newly selected voice name and number will be on the screen and that voice is selected for playing on the kevboard.

Please refer to the Voice List at the back of the manual for a list of all available voices.

KEYBOARD VOICES

USER DEFINED QUICK SELECT BUTTON

You can assign a favorite voice to the USER quick select button. The default voice is the Nylon Guitar. **1** If necessary select line A by pressing the A/B button. The A/B button indicator should be *unlit*. **2** Press any of the Quick Select Voice buttons, and choose the voice you want by using the DATA WHEEL or the +/YES, -/NO buttons to scroll through the voices. The newly selected voice name and number will be on the screen.

Please refer to the Voice List at the back of the manual for a list of all 137 available voices **3** Press and hold the STORE button (not the STORE/BANK button), and press, don't hold, the USER button. Your selected voice will be assigned to this button and available for instant recall by pressing the USER button.

JPlease note, the USER button assignment will be saved when the power is turned off.

ADJUSTING THE KEYBOARD VOICE VOLUME

To adjust the volume of the main, layer or split voice of the keyboard only.

Press the KBD.VOL button and use the DATA WHEEL or the +/YES or -/NO buttons to adjust the volume of the keyboard main instrument voice only, the auto accompaniment will not be affected.
 To adjust the volume of the layer voice press the LAYER button and while the indicator is flashing, press the KBD.VOL button then use the DATA WHEEL or the +/YES or -/NO buttons to adjust the volume of the keyboard instrument layer voice only.

3 To adjust the volume of the split voice press the SPLIT button and while the indicator is flashing, press the KBD.VOL button, then use the DATA WHEEL or the +/YES or –/NO buttons to adjust the volume of the keyboard instrument split voice only.

RECORD

4 You must press the RECORD button again to stop recording. The RECORD button indicator will go out, and the TRACK indicator will stop blinking and remain lit showing that it has recorded information.
5 To exit the record mode, press the TRACK buttons one at a time to disengage all recording functions so none of the indicators are lit. The display screen will return to the currently selected voice.
JPlease note, pressing the Track 1 and Track 2 buttons simultaneously will put the piano in the Play Along Song music teacher mode. Indiscriminate pressing of the RECORD SELECTION group and the SONG/TRACK buttons can overload the piano and cause the circuits to jam. In the event of that occurrence you may need to turn the piano off to reset the circuits.

PLAYBACK

1 To listen to the local recorded data press the TRACK button(s) so that the track(s) you want to hear have lit indicators. If you do not wish to hear a track press that TRACK button until it's indicator is out. Press the track buttons one at a time. Pressing them simultaneously will engage the Play Along Song music teacher feature.

2 Press the PLAY/STOP button to hear the recorded track(s). The PLAY/STOP button's indicator will blink during the playback. You can change the tempo of the playback by pressing the TAP/TEMPO button and using the DATA WHEEL, however this will not change the recorded tempo. The keyboard is available for playing while the recording is playing back. If the metronome is engaged it will tick to the tempo of the recording.

4 Press the PLAY/STOP button again to stop the playback. Playback will stop automatically when the recording reaches its end.

5 To exit the record mode, press the TRACK 1 and TRACK 2 buttons, one at a time, so both indicators go out.

DELETING TRACKS

1 Press and hold the TRACK 1 or TRACK 2 button that you wish to erase for three seconds. Do not press them at the same time.

2 The LCD screen will display a confirmation screen asking if you wish to delete your track.
3 Press +/YES button to confirm, the track will be deleted and the indicator will go out.
Pressing a track button with recorded information while holding the RECORD button will also immediately erase the existing data from your previous recording. Any recording done will record over previous data.

USB TO DEVICE

011 : MUSIC BOX ****PLAYING****

RECORD

This digital piano is equipped with a real time recorder. The song bank has a 2- track sequencer. It will record all note events exactly as they are performed and save it to the local memory. This recorded information will not be lost when the power is turned off. These melody tracks can be saved to a USB disk as MIDI files. These tracks can playback separately, or in combination as a complete song. The two tracks enable you to overdub one song part on top of another, you can even use a different voice if you like.

This piano also lets you record your performances directly to a USB. This way you can record up to sixteen independent tracks not only of the plano voices but also the auto accompaniment. MIDI files on the USB can also be loaded into the piano's local internal memory.

The record feature is a fun and useful addition to any keyboard study program since it lets you hear exactly how you sound from the listener's perspective.

LOCAL RECORDING

1 Before recording prepare the piano by setting the voice, style, volume, tempo, reverb level and other parameters as desired.

Disengage the CHORD/O.T.S. button if you want to play the keys below the split point.

JPlease note, these settings can be stored into a registration memory for easy recall, please see the Registration Memory section for more information.

2 If desired, press the METRONOME button to enable the metronome as a reference. The metronome will sound to the tempo and beat assigned, if you wish to adjust the tempo, do so by using the TAP/ TEMPO button, and if you want to adjust the beat do so in the Function menu before recording as they cannot be changed during recording. The metronome tick will not be recorded.

If you have already recorded one track, the second track's tempo and beat pattern will follow the setting of the first recorded track.

3 Select a track and record. Press and hold down the REC button, then press the track button that you want to record in, TRACK 1 or TRACK 2. The REC button and the selected track button's indicators will blink, showing that the recorder is on standby and will begin recording immediately after a 4 beat count in.

Please note. If you have recorded information on the other track, that indicator will be lit, not blinking, and the recorded music on it will play back as a reference for you while you record the new track. If you do not wish for a previously recorded track to play while you are recording, press the corresponding track button to turn the indicator light off before pressing the REC button. If you select a track, while holding the record button, that already has recorded material, that material will be lost.

JPlease also note. pressing the Track 1 and Track 2 buttons simultaneously will put the piano in the Play Along Song Music Teacher mode. Indiscriminate pressing of the RECORD SELECTION and the SONG/TRACK buttons can overload the piano and cause the circuits to jam. In the event of that occurrence you may need to turn the piano off to reset the circuits.

KEYBOARD VOICES

LAYER VOICE

Layer, or dual, refers to an additional voice that is tone mixed with the selected keyboard voice. The assigned layer voice will be heard with the original voice when the layer feature is engaged. If you need to adjust ratio of the layered to main voice volume, adjust the main voice volume using the KBD. VOL button, this will not affect the layer voice. Adjust the layer voice by using the KBD.VOL button while the LAYER button indicator is flashing.

In the Layer mode the keyboard is split into two sections at the split point. The default split point for voice is the G2 key. A different voice split point can be assigned in the Function menu. Please see the Function section of this manual for more information

1 Press the LAYER button, the currently assigned layer voice will show on the display, and the indicator will light up signaling that the layer feature is engaged. confirm. The display will show the main voice and new layer voice name. **3** To turn the laver feature off press the LAYER button, the indicator will go out. then the display will revert to the selected main voice and layer voice. If the LAYER button indicator is lit, the layer feature is engaged. JPlease also note, engaging the DUET feature will disable the Layer and Split modes.

SPLIT VOICE

In the split, or lower, mode the keyboard is divided into two sections. To the right of the split point the currently selected main voice or the layered voices, will sound. The keys to the left of the split point can be assigned to play a different instrument voice. If you need to adjust ratio of the split to main voice volume, adjust the main voice volume using the KBD. VOL button, this will not affect the split voice. Adjust the split voice by using the KBD.VOL button while the SPLIT button indicator is flashing. The default split point for voice is the G2 key. It can be changed in the Function menu, please see the Function section for more informations.

1 Press the SPLIT button, the currently assigned split voice will show on the display, and the indicator will flash.

2 While the indicator is lit, use the +/YES, -/NO buttons or the DATA WHEEL to select the desired split voice or use one of the quick select voice buttons. The display will show the split voice number and name.

3 Press the SPLIT button to turn the split feature off, the indicator will go out. Please note, with no input, the screen will remain in the split voice menu for five seconds, then the display will revert to the selected main voice and split voice. If f the SPLIT button indicator is lit, the split (lower) feature is engaged.

KEYBOARD VOICES

TOUCH

The TOUCH button engages the touch response. The touch function provides three types of keyboard sensitivity to match different playing styles. Press the TOUCH button and within five seconds use the +/ YES or –/NO buttons to change the touch response from:

1:TouchSoft, the most sensitive keyboard response which permits maximum sound levels with a light touch.

2:TouchNormal, an intermediate response suitable for most styles of music. Normal is the default settina.

3:TouchHard, a less sensitive keyboard response which requires a heavier touch to obtain maximum sound levels.

When the TOUCH indicator is unlit, regardless of how hard you play, the keyboard will transmit at a constant velocity and the sound will be the same volume.

001 : GRAND PIANO 2 : TouchNormal

1 Press the TOUCH button, the currently touch response will show on the display. The indicator will be lit if the touch response in engaged.

2 While the touch response is shown in the display, use the +/YES, -/NO buttons to select the desired touch response. The display will show the voice number and touch response for 5 seconds without input.

3 Press the TOUCH button to turn the feature off, the indicator will go out, and the current fixed velocity value will be shown in the display. The fixed default velocity value is 100. Use the +/YES or -/NO buttons to adjust the value in the range from 0 - 127 while the value is shown. The display will show the voice number and fixed velocity for five seconds without input.

DUET

With the duet feature engaged the keyboard is divided into two sections that play the same notes. The two sections, left A1-C3 and right C#3-C7 have the exact same notes and share the same voice. octaves and volume. This is a great feature for teaching or when two people want the play the plano simultaneously.

When the duet feature is engaged, the pedals will automatically change configuration so there are two sustain pedals, one for each portion of the keyboards.

1 Press the DUET button, the status of the duet feature will be shown in the display, and the indicator will light up signaling that the layer feature is engaged.

2 To turn the duet feature off press the DUET button so that the indicator goes out.

Please note, engaging the DUET feature will disable the Layer and Split modes and the Auto Accompaniment feature.

REGISTRATION MEMORY

RECALL REGISTRATION

KEYBOARD VOICES

EFFECTS

This piano has two digital effects to further enhance the keyboard voice sounds, reverb and chorus.

REVERB

Reverb simulates the effect of playing in a big room or a hall where the sound reverberates off the walls and ceiling. The reverb effect is engaged automatically when the piano is turned on. The reverb setting does not affect the auto accompaniment. Press the REVERB button to turn the reverb effect off and the indicator will go out. Switch the reverb feature on and off by pressing the REVERB button. There are eight reverb effects available:

1-Hall, 2-Hall2, 3-Room1, 4-Room2, 5-Room3, 6-Stage1, 7-Stage2 and 8-Plate. **1** Press the REVERB button, so that the reverb type is shown in the display, you may need to press the button twice, reverb type cannot be selected while the reverb is off. **2** Use the +/YES, –/NO buttons or the DATA WHEEL to select a reverb type. The reverb level for the main, split and layer voices can be changed in the function menu, please see the Function section of this manual for more information.

CHORUS

The Chorus effect adds depth and spaciousness to the selected keyboard voice. Press the CHORUS button to engage the chorus effect and the indicator will light up. Press the button again to turn off the chorus effect. The chorus setting does not affect the auto accompaniment. There are eight reverb effects available: 1-Chorus1, 2-Chorus2, 3-Chorus3, 4-Feedback, 5-Flanger1, 6-Short Delay, 7-Short DelayFb and 8-Flanger2. 1 Press the CHORUS button, so that the chorus type is shown in the display, chorus type cannot be selected while the chorus is off.

2 Use the +/YES, -/NO buttons or the DATA WHEEL to select a chorus type. The chorus level for the main, split and layer voices can be changed in the function menu. Please see the Function section for more information

HALF SUSTAIN

Half sustain is a piano pedal technique in which he sustain pedal is only partially pressed down. When the half sustain feature is selected approximately half the amount of sustain will be applied when the sustain pedal is engaged. Some classical piano pieces call for this technique.

Now the Artesia line has developed this function for their digital pianos. This function allows you to turn on or off the half sustain feature, the default is half sustain on.

RHYTHM **USING THE RHYTHM STYLE**

There are three ways to start the rhythm style; straight start, synchronized start, or with an introduction. You can stop your rhythm style with a finishing ending pattern.

ADJUSTING THE RHYTHM STYLE VOLUME

1 To adjust the volume of only the rhythm style. Press the ACC.VOL button and use the DATA WHEEL or the +/YES or -/NO buttons to adjust the volume of the keyboard rhythm style up or down, the keyboard voice will not be affected.

STRAIGHT START

1 The START/STOP button starts the percussive rhythm immediately. Press the START/STOP button. The selected rhythm style will play.

2 Press the START/STOP button again to stop the rhythm style.

SYNCHRONIZED START

Synchronized Start puts the accompaniment in the standby mode. 1 Press the SYNC START button, the virtual beat indicator dots in the LCD screen will blink at the current tempo, showing that the synchronized start mode is ready. The rhythm style will start as soon as you play in the left hand, accompaniment, section of the keyboard. 2 Press the START/STOP or the SYNC START button again to stop the rhythm style. If the SYNC START button is used, the synchronized start mode will be put back on standby.

SYNCHRO

INTRODUCTION AND ENDING PATTERNS

All of the 100 styles and their variations can be started with an appropriate introduction. **1** Press the INTRO/ENDING button, the rhythm of the introduction will start followed by the main rhythm pattern.

2 Press the SYNC START button before pressing the INTRO/ ENDING button to add an introduction. The introduction, followed by the rhythm style will start as soon as you play in the left hand section of the keyboard.

3 Press the START/ STOP button to stop the accompaniment or press the INTRO/ENDING button again to stop with an ending pattern. An ending pattern can be used at any time regardless of whether you started with an introduction.

VARIATION

1 Press the FILL IN 2 VARIATION button at any time to select the variation of any of the rhythm styles. The indicator will light up and the variation pattern will be selected. If the rhythm style is playing the variation will start at the beginning of the next measure after the variation fill.

2 Press the FILL IN 1 button to revert to the main pattern from the beginning of the next measure after the fill pattern.

ADJUSTING THE TEMPO

There is a virtual four-beat indicator, within the LCD screen, that flashes with the tempo and the beat for the rhythm style playing. Each style has its own preset tempo.

Press the TAP/TEMPO button, the current tempo value will flash on the display. Use the DATA WHEEL or the +/YES or -/NO buttons to change the tempo.

If you press, or "tap" the button twice while a rhythm is playing it will set the tempo to the speed of your taps. If you want to "tap" in a tempo before starting a rhythm style, tap the button 4 times to establish the tempo. The tempo can be adjusted before or during rhythm style play.

If you change rhythm styles while a rhythm style is playing, the tempo will stay at the initial styles value, press the TAP/TEMPO button and then press the +/YES, -/NO buttons at the same time to reset to the new style's default tempo.

Please note, if the METRONOME button is engaged, the metronome tick will sound at the selected rhythm style tempo.

AUTO ACCOMPANIMENT

AUTO ACCOMPANIMENT

Each of the 100 percussive rhythm styles has its own auto accompaniment, dedicated to that style. These auto accompaniment patterns create fully orchestrated rhythm, bass and chord progressions based on the chords that you play with your left hand. The selected rhythm style determines the characteristics of the auto accompaniment. The accompaniment produced is perfectly matched to the selected rhythm style. For auto accompaniment modes the keys are divided into two sections at the auto accompaniment split point. The keys to the left of this point are defined as the accompaniment section of the keyboard. Please note, the keyboard and accompaniment volumes can adjusted independently from each other and the master volume by using the KBD VOL and ACC VOL buttons with the DATA WHEEL.

SPLIT POINT FOR AUTO ACCOMPANIMENT

For auto accompaniment, the keyboard is split into two sections. The default split point is the G2 key. A different split point for the auto accompaniment can be assigned in the Function menu. Please see the Function section of this manual for more information.

CHORD/O.T.S.

The CHORD button *must* be engaged for the auto accompaniment to be available. Press, don't hold, the CHORD/ O.T.S. button so the indicator is lit to engage the auto accompaniment mode. Please see Using the Auto Accompaniment.

Press and hold the CHORD/ O.T.S. button to toggle the O.T.S, or one touch setting, on and off. The display will indicate when the feature has been activated and/or canceled. This convenient feature automatically selects the most suitable voice and various panel settings for you when you select a rhythm style and it's corresponding auto accompaniment.

ADJUSTING THE AUTO ACCOMPANIMENT VOLUME

1 To adjust the volume of only the rhythm style and Auto Accompaniment. Press the ACC.VOL button and use the DATA WHEEL or the +/YES or -/NO buttons to adjust the volume of the keyboard rhythm style and the auto accompaniment up or down, the keyboard voice will not be affected.

AUTO ACCOMPANIMENT THE AUTO ACCOMPANIMENT FINGERING MODE

The auto accompaniment, or auto bass chord, fingering modes of this piano are single or fingered. The default setting is the fingered mode. The fingering mode is assigned in the Function menu. Please see the Function section of this manual for more information.

SINGLE MODE

Single, or intelligent, fingering mode makes it simple to produce four types of orchestrated accompaniment chords using a minimum of fingers, while playing in the auto accompaniment section of the keyboard.

In this mode, keys in the auto accompaniment section of the keyboard are used to produce major, seventh, minor, and minor-seventh chords, the keys are not available for normal playing. The auto accompaniment will start with the percussive rhythm as soon as a key in the auto accompaniment section is played.

Please refer to Using the Auto Accompaniment.

- **Maior Chord:** Press any key in the auto accompaniment section of the keyboard. The key you press determines the root note of the májór chord.
- **Minor Chord:** Press the root key and any black key to its left in the auto accompaniment section of the keyboard simultaneously to produce the minor chord.
- Seventh Chord: Press the root key and any white key to its left (7th key) in the auto accompaniment section of the keyboard simultaneously.
- Minor-Seventh Chord: Press the root key and both a black key and a white to its left in the auto accompaniment section of the keyboard simultaneously

FINGERED MODE

The fingered mode is ideal if you already know how to play chords on the keyboard. It allows you to play the chords in the auto accompaniment section of the keyboard that produce the selected auto accompaniment pattern. The auto accompaniment will start as soon as a recognized chord is played in the auto accompaniment section of the keyboard, the keys are not available for normal playing. Please refer to Using the Auto Accompaniment.

Please note, if a chord played cannot be recognized (fingered beyond the table), the previous chord will keep playing. An unrecognized chord cannot start the auto accompaniment. Please see the Auto Accompaniment Fingering Guide table at the back of this manual for a list of all the 32 playable chords of this mode.
